Armstrong World Industries, Inc. is a global leader in the design and manufacture of floors, ceilings and cabinets. In 2008, Armstrong's consolidated net sales totaled approximately \$3.4 billion. Based in Lancaster, PA, Armstrong operates 40 plants in 10 countries and has approximately 12,200 employees worldwide.

Armstrong Floor Products: AFP is a worldwide leader in manufacturing and marketing of residential and commercial floor products. Armstrong and its family of brands -- Armstrong, Bruce® and Robbins® -- offer the most extensive portfolio of flooring products available. With targeted products for both residential and commercial applications, our portfolio includes resilient sheet and tile, hardwood, laminates, and linoleum. ToughGuard™ vinyl sheet flooring, introduced by Armstrong in 2000 and manufactured with a new process that dramatically improves the durability of residential sheet vinyl, continues gaining market share and has raised the industry standard for resilient flooring performance. ArmaLock™ and SwiftLock™ locking laminates, floors that are installed without glue, are also big with “do it yourself” consumers. Linoleum, the original classic resilient floor, now considered a “green” flooring product, is making a comeback in the U.S. as architects and designers – as well as homeowners – require more environmentally friendly building materials that don't sacrifice color vibrancy and design.

After more than a century, Armstrong remains the foremost name in flooring -- known and trusted for innovation, quality and expansive offering of colors and designs to meet the personal style of all customers. Armstrong. Your ideas become reality™.
